

# Pioneer Premiere Form Oil

## Applications

Pioneer Premiere Form Oil is recommended for lubricating steel or wood forms into which concrete is poured.

## Features

Pioneer Premiere Form Oil is a mineral base lubricant for application on wood or steel forms used in concrete construction.

Excellent lubricity and forms-covering power help minimize surface cavitation, thus reducing the need to patch voids in concrete surfaces.

Tough Lubricant film prevents forms from sticking to poured concrete, thus promoting a smooth concrete finish and easy removal of forms.

Light color minimizes discoloration of concrete.

Protective lubricant film eliminates cleaning of steel and wood forms for manpower savings.

## Typical Specifications

Specific Gravity @ 60°F	0.849
Pour Point, °F, D97	0
Viscosity @ 100°F, D445	24.8
Flash Point, °F, D92	442
Color, D1500	L 0.5
